“ Your home says a lot about you and my client wanted his master bathroom to make a wow statement. This updated and renovated bathroom was inspired by upscale classic spas. It was important to my client to have a light and airy feel and provide a sense of serenity, yet be visually engaging. The Realstone product that surrounds the free standing tub adds a backdrop of natural art, subtle color, and fantastic texture. Blending beauty with function allows a maintenance free environment. I absolutely love the flexibility of Realstone products.
